Print and camera calibration

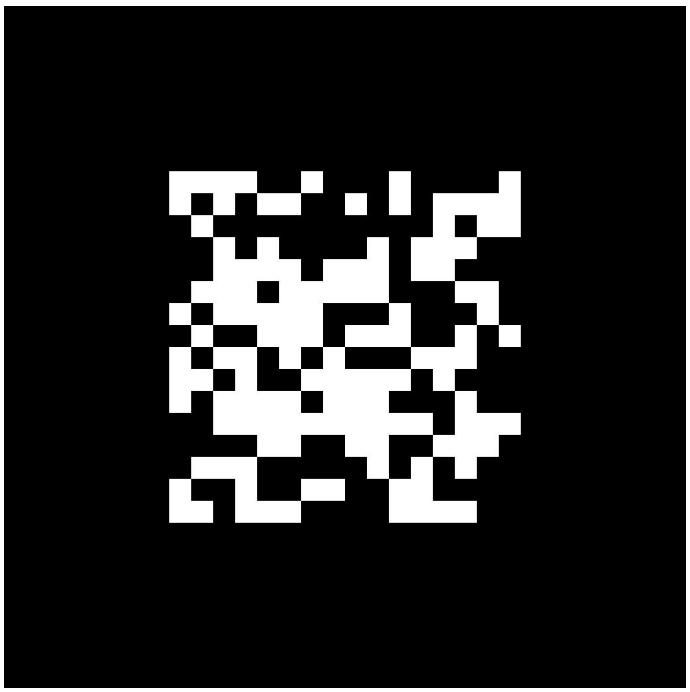

Complete this page before printing the full event pack.

100 mm print calibration bar

1. Print this page at Actual size or 100%. Disable Fit, Shrink, and Scale to page.
2. Measure the bar with a physical ruler. It must be 100 mm before marker testing continues.
3. Keep the marker flat, evenly lit, and fully visible. Do not cover or trim its black border.
4. Record recognition results on the actual iPhone and Android devices that will be used at the event.

Test marker - same 90 mm artwork size as every placement page
